October 28, 2019

To Whom It May Concern:

As Aaron Bolduc's Honors Pre-Calculus and AP Calculus AB teacher at Blackstone Valley Tech High School, I found him to be a very respectful, intelligent, passionate, and determined student. Aaron is in the most advanced math course offered, AP Calculus AB, a course that consists of the top mathematics students out of a class of 306. Throughout Aaron's time at Blackstone Valley Tech, he has been consistently in the top 10 students of the senior class. As his teacher, I have found that Aaron has an exceptional understanding of the mathematics curriculum and is relentless in grasping comprehension. Aaron has always been very concerned for his well-being and will not hesitate to ask for help if he has a question. Aaron has been a disciplined student, completing all of his work and working with others as an effective communicator, often explaining to fellow students how to grasp an intricate mathematical method.

Aaron has challenged himself academically with a mix of Honors and AP classes. In addition to AP Calculus he has already taken two AP exams as well as enrolling in two AP courses this year.

Aaron is a multifaceted person interested in more than just academics. He consistently excels in academics while having a full schedule of a part time job and sports. When Aaron's name is discussed around BVT, the recurring theme is always a respectful, motivated, intelligent, and all around great young leader.

Aaron is the ideal student because he will graduate from Blackstone Valley Tech with an extensive knowledge and reputation in Information Technology and applied mathematics, as well as the academic education including AP Calculus AB, AP Physics, AP Literature, and AP Language, a combination that many applicants will lack. Any program would benefit greatly in having such a hard-working, intelligent, and determined person who will thrive in any academically demanding school. Therefore, I give Aaron Bolduc my highest recommendation without reservation.

Please do not hesitate to contact me for further information.
